

JP ROBINETTE

Director of Engineering and Construction, Sites Project Authority

JP has over 17 years of experience as an engineer, project manager, and leader in various industries. He is currently the Engineering and Construction Manager for the Sites Project Authority. In this role, he has oversight of all engineering, construction, and finance matters for the proposed \$4B off-stream reservoir project. During his time with the Sites Project Authority, JP has led the development of the Authority's contracting and delivery strategy and is responsible for helping to secure the project funding, which includes a recent invitation and application for a \$2.2B WIFIA loan.

In 2022, JP founded Robinette Consulting with a focus on helping agencies work together to deliver generational water and wastewater infrastructure projects.
