

# Eveart Foster

## Integration Subject Matter Expert, Autodesk

Eveart Foster is an Integrations Subject Matter Expert at Autodesk, Inc., a global leader in software for designers, builders, engineers, manufacturers, 3D artists, and production teams. Eveart leverages his experience in gap analysis, customer success, product management and enterprise level technology optimization to advance digital transformations across people, processes, and solutions in the construction industry. He has strategically held positions as both an end-user and developer of emerging technologies to optimize the entire construction project lifecycle; from planning and design to handover and operations.

He also serves as Associate Board President at Working in the Schools (WITS); Chicago's largest literacy nonprofit, providing mentorship to Chicago public school students and professional development to teachers. He recently joined the Employer Advisory Council for Revolution Workshop, a nonprofit social enterprise that provides construction workforce development for unemployed or underemployed people in Chicago. To sharpen his communication skills, Eveart periodically performs improv, delivers speeches, and occasionally hops on podcasts to provide construction industry expertise. You can find him on the Contech Crew, Bricks and Bytes, and Work Done Right podcast episodes.

Eveart graduated from Indiana State University with a bachelor's degree in mechanical engineering. Notable achievements include the Autodesk Subject Matter Expert of the Year, Best Overall Project at the Chicago AEC Hackathon 3.5, Building Design + Construction Magazine's 40 under 40, and Chicago Crain's Business Magazine 20 in their 20s.
