

# Allison Scott

## Director, Growth Enablement & Customer Engagement Sustainability, Autodesk

Alli Scott is a technology translator and growth strategist supporting Autodesk's Sustainability & Impact team. With 20 years of experience across architecture, construction, and emerging tech, she helps leaders in the design and make industries turn bold ideas into real-world sustainable solutions — building trust through deep listening, strategic collaboration, and authentic engagement.

Prior to her role in sustainability, Alli led customer experience, advocacy, and thought leadership efforts within Autodesk's construction business helping to bring Autodesk Construction Cloud to market. Before joining Autodesk, she shaped national innovation strategy at Skanska USA, a leading construction firm, helping to bring game-changing technologies and services to life on jobsites across the country. Alli began her career working for renowned futurist and technology leader Ray Kurzweil, blending her passion for technology, go-to-market transformation, and disruptive innovation early on.

Alli holds a BA in Theatre from Emerson College and an MBA in Innovation and Design Management from Suffolk University. She's an award-winning keynote speaker and an active industry voice connecting startups and the built environment.

When she's not exploring the next wave of emerging tech, you'll find her lakeside in Maine or on the rocky shores of Massachusetts with her architect-husband, young son, and a thriving herb garden.
