

# BERNIE DELGADO

## Senior Construction Management Student, CSU Long Beach

Bernie Delgado is a senior Construction Management student at Cal State Long Beach, minoring in Entrepreneurship. She currently serves as Vice President of CSULB's DBIA student chapter and Co-Captain of the ASC Reno Design-Build Team. She is excited about building a career in project management and real estate development, with an interest in preconstruction. Her goal is to grow into a resourceful and adaptable project engineer who adds value throughout all stages of a project.

Participating in the C2C mentorship program has been a key part of her journey. It helped her build confidence, clarify my career goals, and connect with an industry professional who supports my success in this industry.
