

Sarab Singh

Associate Vice President, Capital Programs & Facilities Management California State University, Fullerton

Sarab Singh serves as the Associate Vice President of Capital Programs & Facilities Management at California State University, Fullerton, where he oversees the planning, design, construction, operation, and maintenance of campus facilities. He brings more than 30 years of experience in capital development, facilities operations, sustainability, environmental health and safety, and strategic planning, including over 27 years of leadership within the California State University system.

Mr. Singh has directed more than \$2 billion in capital projects and operational initiatives, leading programs from early planning through construction and long-term facility stewardship. His expertise includes a broad range of project delivery methods, including design-bid-build, design-build, collaborative design-build, Job Order Contracting (JOC), Task Order Contracting Agreements (TOCA), and Construction Manager at Risk (CMAR). He has extensive experience delivering complex public-sector projects while balancing cost, schedule, quality, safety, and stakeholder expectations.

At CSUF, Mr. Singh currently leads a capital portfolio exceeding \$500 million and serves as the University's principal facilities administrator. His responsibilities include campus master planning, deferred maintenance strategies, infrastructure renewal, sustainability initiatives, and operational improvements that support student success and the University's long-term mission.

Mr. Singh holds a Master's degree in Environmental Engineering and a Bachelor's degree in Civil/Construction Engineering. He is a Certified Construction Manager (CCM), Project Management Professional (PMP), and Certified Educational Facilities Professional (CEFP).

As an active leader in the construction and facilities industry, Mr. Singh values collaboration between owners, designers, contractors, and industry partners to advance best practices in project delivery, innovation, and the stewardship of public facilities. His experience in both capital development and facilities operations provides a unique perspective on delivering projects that create lasting value and support resilient, sustainable communities.
