

Usman Husaini

Engineering Group Manager – nta Clara Valley Transportation Authority (VTA)

Usman is serving as VTA’s engineering group manager for rail systems, within the Engineering and Program Delivery Division. His main responsibility is delivery of VTA’s light rail capital program in the areas of state of good repair, transit efficiency, safety and expansion. Focus areas include inter-disciplinary project delivery, safety certification, rail activation, multi-modal corridors and team mentorship. In recent years, he has led substantial state of good repair efforts on VTA’s alignment including replacement of complex track junctions, signal interlockings, sub-stations and overhead catenary elements. He is also responsible for rail activation and commissioning for the Eastridge to BART Regional Connector (EBRC), VTA’s latest light rail extension. He has been with the agency for eighteen years.
