

Angel Palma

Senior Civil Engineer, Construction Management Division
Port of Long Beach

Angel Palma is a Senior Civil Engineer with the Port of Long Beach and a licensed Professional Engineer in California. He holds both bachelor's and master's degrees in civil engineering and is a Certified Construction Manager (CCM). Angel started as an intern at the Port of Long Beach in 2011 and eventually promoted to its current position as a Senior Civil Engineer. He has over 15 years of civil engineering and construction manager experience including overseeing the execution of the Port's Capital Improvement projects that include Port/Harbor infrastructure, transportation, rail, and fire station/boat bay building projects. Angel is leading the Port of Long Beach's first rail yard project as part of an eight-year capital improvement program, helping advance critical freight mobility and infrastructure modernization initiatives.
